Premium quality in every layer

We use only the best components for a finished product that delivers unmatched quality and durability:

- Finest quality Canadian galvanized steel
- Polyester paint topcoats to protect the underlying zinc coating
- Thermal-Break separates steel skins to reduce cold/heat conductivity, and stops frost and moisture from collecting on the inside of the door

Hardware

We design and manufacture all hardware components to ensure:

- Optimum strength, durability and smooth operation
- Highest gauge and strongest steel amongst the market
- Top quality nylon rollers for long life and quiet operation
- Computer balanced oil tempered torsion springs, steel bearings and die cast cable drums increase ease of operation
- Corrosion resistant galvanizing is used on all steel parts to reduce the possibility of rusting

Weather Seal

- Exterior grade, double finned weather-stripping provides excellent protection from outside elements as well as a crisp finishing touch to the perimeter of your door.
- Air and wind flow is eliminated by the use of a continuous weather seal inserted between each section.
- Arctic grade seal conforms to minor floor irregularities providing protection against outside air, dust, dirt and moisture.

Virtually Maintenance Free

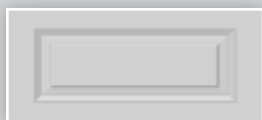

Finished with a factory applied, baked-on, two-coat exterior polyester paint finish on both sides gives years of maintenance-free operation. The seamless steel inside brightens the interior of the garage and is easy to keep clean.

Unnecessary Lifetime Warranty

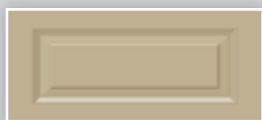

Sure, we have a lifetime warranty. But, after thousands of tests performed on all of our parts, we don't think you'll ever need it. In fact, only 0.01% of our customers ever do. See dealer for complete details
